

# Workshop Layout Discussion

Ron Bowater

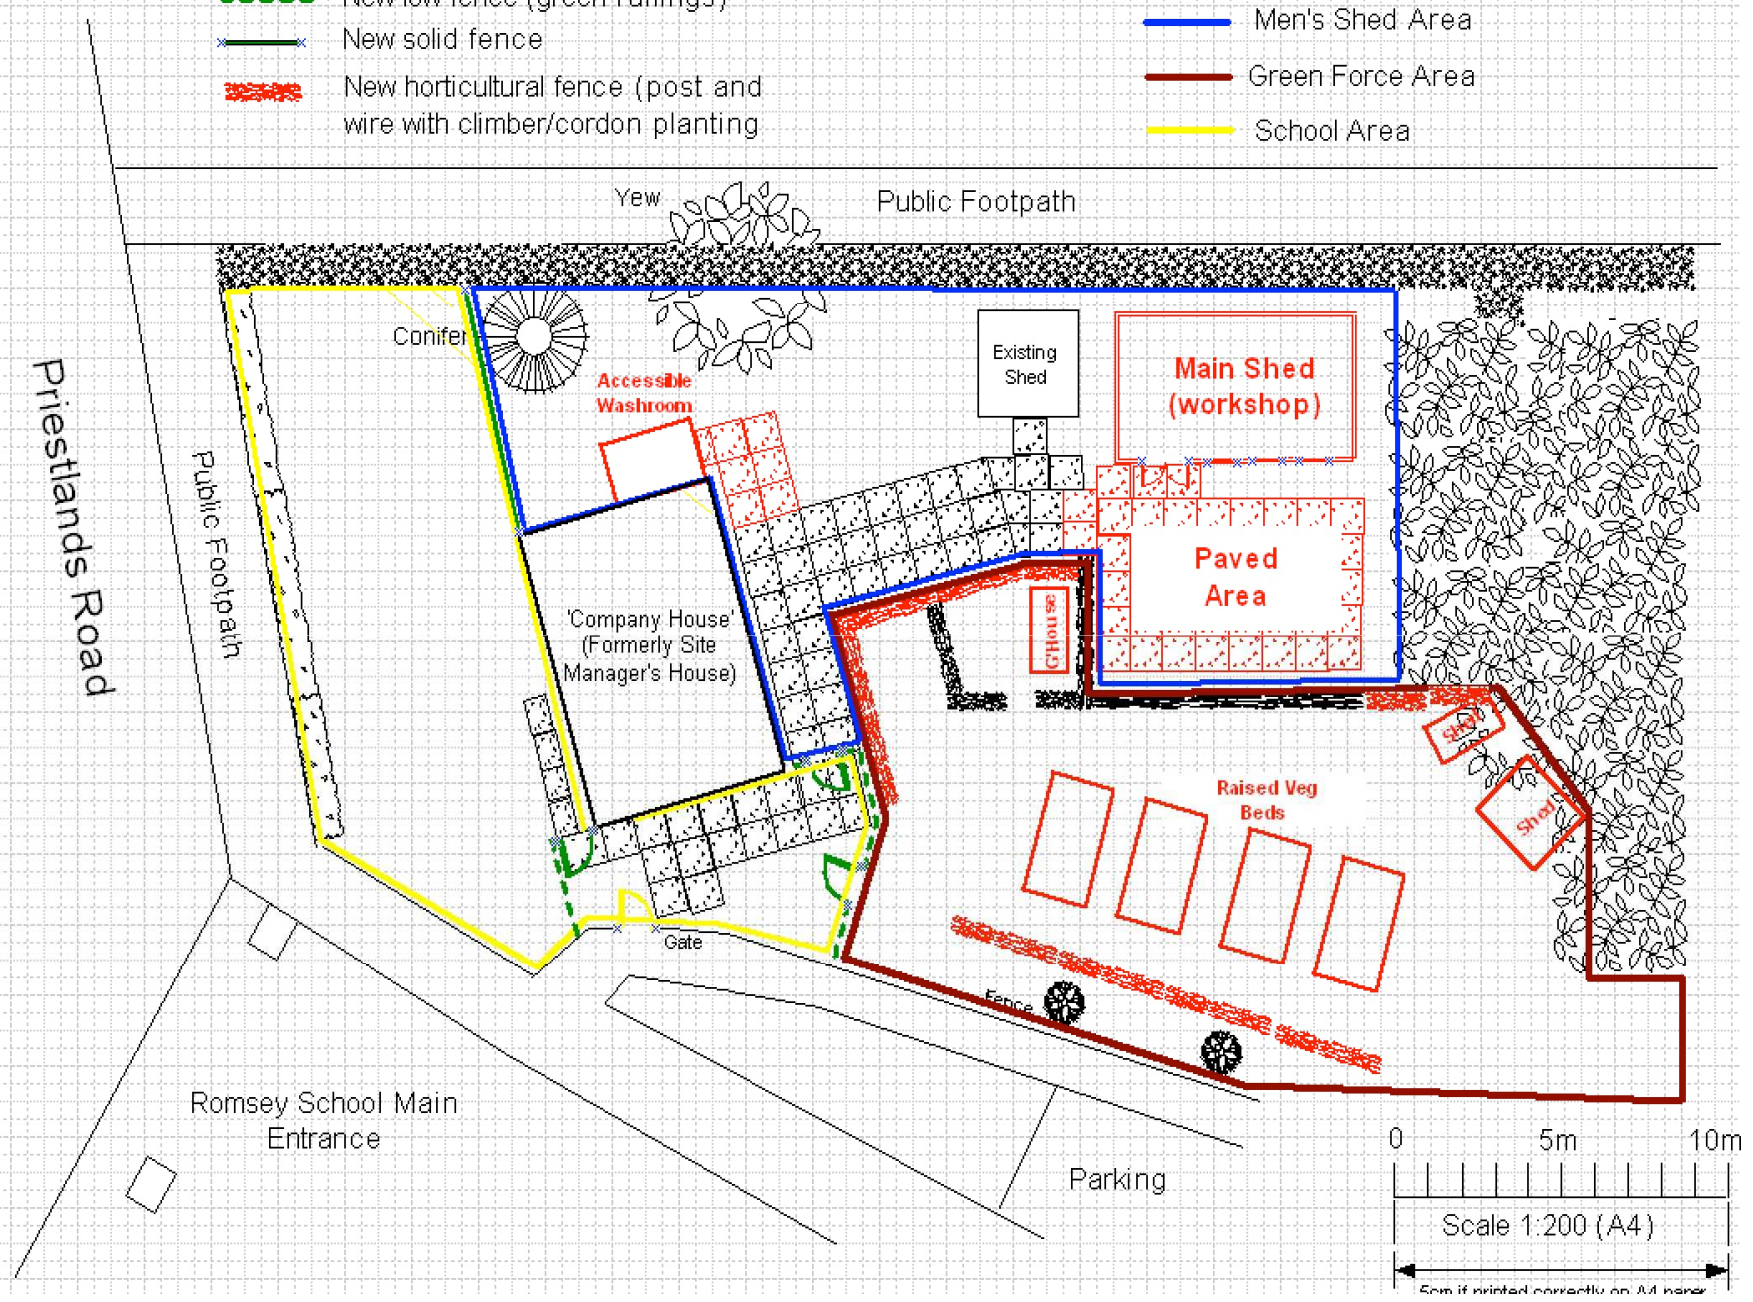

24<sup>th</sup> May 2017

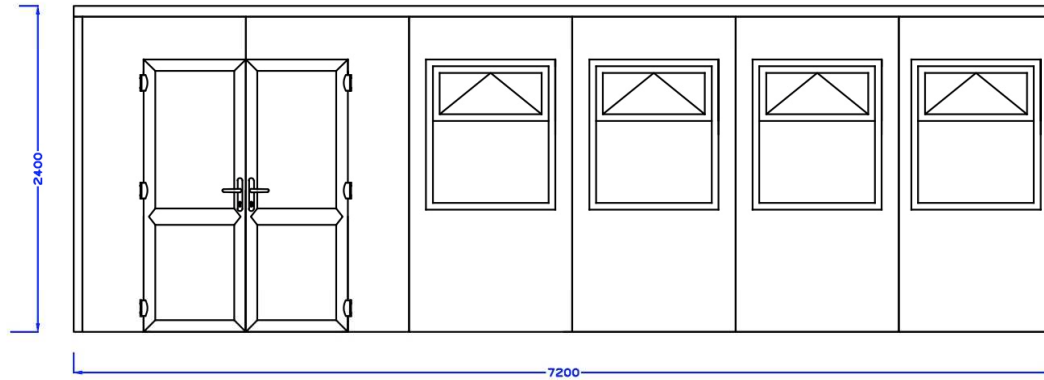

- After two years of planning and fund raising, Romsey Men's Shed members are busy constructing our new 'complex'.
- Working towards an Easter 2018 'Grand Opening'
- Three buildings on the site in garden of old caretaker's house:
  - Existing wooden shed 3m x 3m – tool and materials storage
  - Accessible washroom
  - Workshop 7m by 4m internal
- We would like advice on layout and fitting out of the workshop e.g.
  - What benches should we have and where (fixed or movable)
  - What power tools do we need initially and in the future
  - Which tools should be fixed and which moveable/stored for occasional use.
  - Also advice on lighting, heating etc
- What are the essentials and what are 'nice to have' ?
- What mistakes should we not make ? What should we avoid ?

-  New low fence (green railings)
-  New solid fence
-  New horticultural fence (post and wire with climber/cordon planting)

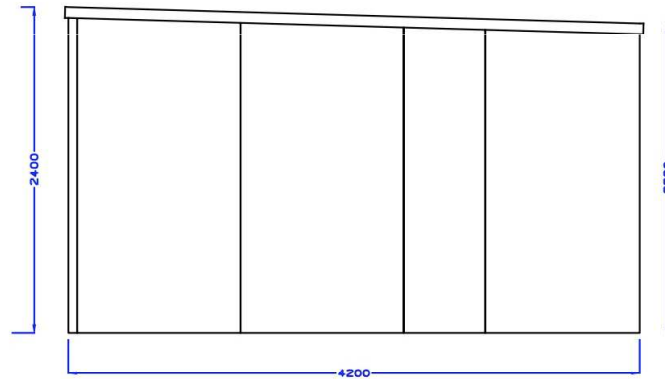

-  Men's Shed Area
-  Green Force Area
-  School Area

FRONT ELEVATION

SIDE ELEVATION
